

Presenting PowerPoint Content On-The-Fly

This is called presenting content on-the-fly, because you don't have to pre-load the content.

Content Type	How it Works
<p>PowerPoint</p>	<p>Each slide in a PowerPoint file is converted to a static image. Please note that slide transitions, animations, and links will be lost in the conversion process.</p> <p>You can upload a PowerPoint presentation and push it out in one of 3 ways:</p> <ul style="list-style-type: none"> • To the Content Frame for read-only viewing • To the eBoard for annotating • To a New Window for individual navigation by participants

Of these three above options, you typically want to select "eBoard" which is the default option.

When you are a presenter by default or you are promoted as a presenter, you will see the following in the upper right hand corner. In the upper right you will have a Presenter Interface (shown below).

You can upload and access your document in 3 easy steps.

<p>1</p>		<p>A. Click the Import PowerPoint button in the Presenter's Console.</p>
<p>2</p>	<p>The dialog box is titled 'Import a PowerPoint File'. It contains a text field for 'PowerPoint File:' with a 'Browse...' button. Below it is a 'Display In:' dropdown menu set to 'the eBoard'. A note states: 'Note: A new folder will be created for each imported PowerPoint presentation.' At the bottom is an 'Import' button.</p>	<p>B. Browse for the PowerPoint file.</p> <p>C. Select the display frame.</p> <p>D. Click Import.</p>

3

To push out content:

- A. Click the title of the slide, or
- B. Click the orange navigation arrows  , or
- C. Click the Preview button  to preview the slide or push the slide to a Breakout Room.

PowerPoint files are automatically converted to static images during import. Displaying the PowerPoint slides in the eBoard will allow you to annotate the slides.
